

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

libraries, etc., forty-three notices that their publications have been forwarded to the Academy, together with twenty-five applications for exchange of publications and asking for deficiencies.

Twenty-one letters on various subjects have been received and twenty-six written. Fifteen circulars and invitations to the Academy to participate in Congresses or meetings, and announcements of the deaths of scientific men have been received, and when necessary acknowledged.

During the year two correspondents have been elected and notified.

The deaths of the following correspondents have been reported :

Auguste Louis Brot, of Geneva, Switzerland ; elected in 1887, died August 30, 1896.

Constantin von Ettingshausen, of Gratz, Austria ; elected in 1859, died February 1, 1897.

Rev. Samuel Haughton, of Dublin, Ireland ; elected in 1868, died November, 1897.

Johannes Japetus Smith Steenstrup, of Copenhagen, Denmark ; elected in 1878, died June 20, 1897.

Seven hundred and three acknowledgements for gifts to the library, and one hundred and ten acknowledgements for gifts to the museum have been forwarded.

Respectfully submitted,

BENJ. SHARP,
Corresponding Secretary.

REPORT OF THE LIBRARIAN.

The total of additions made to the library of the Academy since the close of November, 1896, is 5,145. Of these 4,476 are pamphlets and parts of periodicals, 651 volumes, 15 maps and three photographs.

They have been received from the following sources :—

Societies,	2,252	U. S. Dept. of the Interior,	35
I. V. Williamson Fund, . .	1,244	Charles P. Perot,	28
Editors,	896	Wilson Fund,	20

Voyages and Travels, . .	30	Herpetology,	1
Ichthyology,	25	Miscellaneous,	74
Anatomy and Physiology, . .	23		

The slight falling off in receipts from the number reported last year is owing to the decrease of appropriations, made necessary by the large expenditures for 1896. To the same cause is due the comparatively small number of volumes bound, which amounts to only 270, a large part of these being credited to the special funds, thus farther curtailing the amount available for the purchase of books.

In the cases, secured by the removal last year of the stock of publications of the Academy to the basement, have been arranged the books on Physical Science and Anthropology, the latter section of the library being more than doubled by the large collection of valuable works included in the Meigs bequest. Extensive additions of case room are required in nearly every department of the library, the maintenance of the geographical arrangement of the journals and periodicals being increasingly difficult from year to year. The plan suggested in the last report of arranging journals devoted to special subjects in connection with the special departments of the library, does not seem to meet with the endorsement of those immediately concerned, so that no transfers have been made.

A portrait in oil of the late Professor Edward D. Cope by C. A. Worrall, has been procured by subscription and added to the gallery.

The Librarian improved the occasion of his attendance last July at the Second International Library Conference held in London, to inspect the scientific sections of a number of libraries there and elsewhere throughout the United Kingdom, with the result of being able to congratulate the Academy on the extent and convenience of

arrangement of its collection of books which in both respects compares favorably with those of much older establishments. In liberality of administration the Academy is especially deserving of recognition, as, apart from the fact that under the By-Laws the books must be consulted on the premises, it places on the reader none of the restrictions almost universally met with elsewhere.

It is increasingly apparent that the growth and arrangement of the library are seriously interfered with by lack of means. If it were not for the care taken to secure the largest possible return from exchange of publications, the other resources at the disposal of the Library Committee would be entirely inadequate, and the opportunity for advanced study in the Academy would be materially curtailed. This would be now more than ever the cause of serious regret, because the library was never so much resorted to by students of kindred institutions as it has been during the past year. Not only for such readers, but more especially for our own workers, it is essential that the latest scientific literature be placed promptly on our shelves and in such binding as to make it most convenient of access with the least wear and tear. To secure these ends at least double the income now at the disposal of the Library Committee will be required.

Acknowledgement is again due Mr. Wm. J. Fox for efficient service in the library, especially during the Librarian's absence in Europe.

All of which is respectfully submitted.

EDWARD J. NOLAN,
Librarian.

REPORT OF THE CURATORS.

The past year has been characterized by a greatly increased interest on the part of the general public in the Academy's Museum, owing to the better facilities for the exhibition of the collections afforded by the new museum building, the opening of which was recorded in our last report. New cases have been placed on the first and second floors of the new building, and much has been accomplished in perfecting the arrangement of the various collections.

The Curators are able to report the specimens at the present time in an excellent state of preservation, although the impossibility of the systematic arrangement and proper display of the collections
